

## Logging In

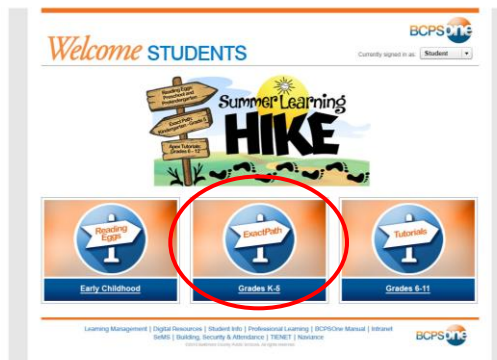

**Step 1:** To access the Summer Learning Hike Exact Path Reading and Mathematics-Grades K-5, specially identified for your student based upon their School Year (SY) 19-20, log into BCPSOne.org using your student's BCPS credentials.

**Step 2:** Select the "Summer Learning Hike" tile.

**Step 3:** Select the "Exact Path - Grades K-5" tile.

**Step 4:** You are taken to the Dashboard Screen:

**Step 5:** You have now accessed your student’s lesson and are ready for them to learn!

### Navigating Exact Path Reading and Mathematics-Grades K-5

On this page your student can:

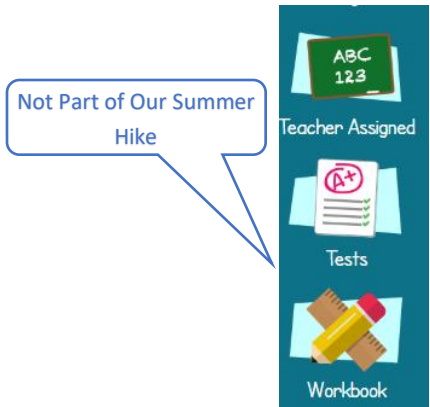

- Start Reading or Mathematics Lessons.

- Review Learning Path for course progress
  - Your student will participate in lessons, practice concepts, and check their understanding through quizzes.
  - All links look the same for both reading and mathematics. Remember, your student needs to choose which content area they will be working on. It is suggested that students dedicate a total of 90 minutes of work each week in ExactPath (45 minutes for Mathematics and 45 minutes for Reading).
  - Families may choose to structure this time in a manner that best meets the needs of the student and family. For example, three thirty minute sessions per week or six fifteen minute sessions per week.

- Summer Learning Hike is meant to reinforce skills that were taught this year. Your student does not have an assigned teacher to lead instruction. Although, teachers will have designated office hours to assist students who may need extra support. As a result, the links below WILL NOT be utilized over the Summer.

- To reward your student for Reading and Mathematics skills mastered, students will earn achievement rewards.
